 Website: www.iawisil.com

Order Information

Minimum order accepted is \$60.00. To place an order:

- 1) Call us Monday through Friday 8:30 a.m. through 4:30 p.m. at 563-852-5056.
 If you get our voice mail, leave a message and your return phone number.
- 2) Fax your order to: 563-852-6056.
- 3) Email us your order at leo@iawisil.com.
- 4) Mail your order to: Iawisil Nursery, 24333 N. Cascade Rd., Cascade, IA 52033
 Hit back arrow for link to print order form

Payment: Checks, money orders, and credit cards are acceptable.

We accept Visa and MasterCard only, but not on our website at this point. You must call our office.

A 30% deposit is required to reserve an order.

The balance is due no less than 10 days before shipping.

Full payment for orders less than \$150.00 should accompany the order.

Residences of Iowa must pay a 6% sales tax plus the local 1% option tax which is applicable to your home area, regardless whether the order is picked up here at the nursery or shipped.

Contractors, nurseries, etc. must provide a tax exempt number. Out-of-state customers must pay the

Iowa sales tax of 7% if you pick up your order at our nursery or unless a government agency, or tax exemption certificate number can be provided.

***Freight, Packing and Handling:**

A standard freight charge of 15% (pre-tax) must be added to the order total, unless the order is picked up.

There is a minimum freight charge of \$15.00. If actual freight charges exceed 15%, customers may be charged.

A standard handling and packing charge of 8% (pre-tax) must be added to the order total except for potted stock

We encourage customers to pick up bareroot stock over 4 feet and all potted stock as these cannot be shipped by common carrier (UPS, FedEx, etc.) economically. Otherwise we will arrange for custom delivery in consultation with you. Prices and availability subject to change without notice.

Product Code	Description	1-24	25-99	100-399	400+	Total \$
Evergreen Trees - bareroot, transplants						
AVA12	American Arborvitae - size 12-18"	\$1.62	\$0.72	\$0.56	\$0.40	(Thuja occidentalis), also called Northern White Cedar. Native to northeastern
AVA18	American Arborvitae - size 18-24"	\$1.92	\$0.86	\$0.67	\$0.48	states. Propagated from seed, thus less genetic uniformity than the cultivars such
AVA2F	American Arborvitae - size 2-3'	\$2.32	\$1.04	\$0.81	\$0.58	as Techny and Dark Green arborvitae. Arborvitae are desirable in screens and
AVA3F	American Arborvitae - size 3-4'	\$3.80	\$1.71	\$1.33	\$0.95	windbreaks because they are evergreens and retain full foliage during the winter,
AVA4F	American Arborvitae - size 4-5'	\$5.60	\$2.52	\$1.96	\$1.40	and also because they retain branches with foliage right to ground level. They can
AVA5F	American Arborvitae - size 5'+	\$12.60	\$5.67	\$3.15		be planted close together in rows and make a tight screen for privacy or to block
AVGG	Green Giant Arborvitae - size 12-18"	\$4.80	\$2.16	\$1.68	\$1.20	out winter winds. Green Giant is a cultivar (clone) of American Arborvitae
AVT6'	Techny Arborvitae - size 6-12"	\$5.60	\$2.52	\$1.96	\$1.40	(Thuja occidentalis techny, The Techny is a highly desired cultivar of American
AVT12	Techny Arborvitae - size 12-18"	\$8.80	\$3.96	\$3.08	\$2.20	Arborvitae. It is the most drought and winter-burn resistant of the arborvitae. As
AVT18	Techny Arborvitae - size 18-24"	\$11.20	\$5.04	\$3.92	\$2.80	with all cultivars, Technys are genetically uniform. One row in a windbreak of pine
PS2F	Scotch Pine - size 2-3'	\$4.80	\$2.16	\$1.68	\$1.20	or spruce is good design.
PS3F	Scotch Pine - size 3-4'	\$5.80	\$2.61	\$2.03	\$1.45	(Pinus sylvestris) Once the predominant Christmas tree species. Subject to
PS4F	Scotch Pine - size 4-5'	\$11.80	\$5.31	\$4.13	\$2.95	needle diseases now. Will grow on poor soils.
PW12	White Pine - size 12-18"	\$3.80	\$1.71	\$1.33	\$0.95	
PW18	White Pine - size 18-24"	\$4.80	\$2.16	\$1.68	\$1.20	(Pinus strobus) White Pine is a grand tree with a grand history. Used for mast in
PW2F	White Pine - size 2-3'	\$8.40	\$3.78	\$2.94	\$2.10	sailing vessels as well as in home construction. River towns such as Dubuque
PW3F	White Pine - size 3-4'	\$10.40	\$4.68	\$3.64	\$2.60	sport old manufacturing buildings with huge White Pine beams. Native from
PW4F	White Pine - size 4-5'	\$11.80	\$5.31	\$4.13	\$2.95	northeast Iowa to Maine down the Appalachians. Fast growing. Birds, pheasants
SBH6i	Black Hills Spruce - size 6-12"	\$3.40	\$1.53	\$1.19	\$0.85	and wild turkey find winter protection in groves or reforestation plantings.
SBH12	Black Hills Spruce - size 12-18"	\$3.80	\$1.71	\$1.33	\$0.95	(Picea glauca) A regional race of white spruce from the Rocky Mountains and
SBH18	Black Hills Spruce - size 18-24"	\$6.00	\$2.70	\$2.10	\$1.50	Black Hills which tends to be more compact and darker green than white spruce.
SB6"	Blue Spruce - size 6-12"	\$3.40	\$1.53	\$1.19	\$0.85	
SB12	Blue Spruce - size 12-18"	\$3.80	\$1.71	\$1.33	\$0.95	
SB18	Blue Spruce - size 18-24"	\$6.00	\$2.70	\$2.10	\$1.50	(Picea pungens) Highly prized ornamental evergreen. Colors for individual trees
SN12	Norway Spruce - size 12-18"	\$3.80	\$1.71	\$1.33	\$0.95	vary from green to blue. Has some disease issues.
SN18	Norway Spruce - size 18-24"	\$6.00	\$2.70	\$2.10	\$1.50	(Picea abies) The largest and fastest growing spruce species in our area. Because
SN2F	Norway Spruce - size 2-3'	\$10.40	\$4.68	\$3.64	\$2.60	of its fast growth (the distance between the annual whorls is large), this spruce is
						less dense. But it's not fussy about where it's planted

SW6"	White Spruce - size 6-12"	\$2.40	\$1.08	\$0.84	\$0.60
SW12	White Spruce 12-18"	\$3.80	\$1.71	\$1.33	\$0.95
SW18	White Spruce - size 18-24"	\$6.00	\$2.70	\$2.10	\$1.50
SW2F	White Spruce - size 2-3'	\$8.00	\$3.60	\$2.80	\$2.00

(*Picea glauca*) White Spruce is a widely distributed tree along the northern U.S. and nearly all of Canada. It makes a handsome ornamental and windbreak tree. It is scattered into hardwood plantings, birds find winter cover and it adds to the aesthetics of a hardwood tree planting. Less problems than blue spruce.

Hardwood Trees - bareroot stock

ABU2F	Blue Ash - size 2-3'	\$3.20	\$1.44		
ABU3F	Blue Ash - size 3-4'	\$4.80	\$2.16		
ABU4F	Blue Ash - size 4-5'	\$10.40	\$4.68		

(*Fraxinus quadrangulata*) A handsome tree, Blue Ash is fairly rare in Iowa (It is listed as "threatened".) It has unusual quadrangle shaped twigs.

AG12	Green Ash 1-0, size 3-6"	\$1.00	\$0.45	\$0.35	\$0.25
AG2F	Green Ash - size 2-3'	\$2.72	\$1.22	\$0.95	\$0.68
AG3F	Green Ash - size 3-4'	\$5.80	\$2.61	\$2.03	
AG4F	Green Ash - size 4-5'	\$8.80	\$3.96		
AG5PL	Green Ash - size 5'+	\$14.00	\$6.30		
	Green Ash - size 6-7'	\$18.80	\$8.46		

(*Fraxinus pennsylvanica*) Green Ash is perhaps the most common ash. Similar to white ash and red ash. Most likely found on bottomlands and moist sites. Fast growing and adaptable. Historically the wood has been important. The threat of the Emerald Ash Bore disease hangs over all ash species. It remains to be seen if it will devastate the Ash tree populations in our area as it did to the east in southern Michigan and Ohio.

BN6"	Butternut - size 6-12"	\$4.80	\$2.16		
BN12	Butternut - size 12-18"	\$6.40	\$2.88		
BN18	Butternut - size 18-24"	\$8.80	\$3.96		

(*Juglans cinerea*) Butternut is also called "white walnut". It is a close relative of walnut but the wood is lighter in color and not as hard. Used in furniture and wood carving. The species has been plagued by the butternut canker in recent years. Planting is encouraged to preserve species.

CB3"	Black Cherry - size 3-6"	\$1.40	\$0.63	\$0.49	\$0.35
CB6i	Black Cherry - size 6-12"	\$1.60	\$0.72	\$0.56	\$0.40
CB12	Black Cherry - size 12-18"	\$2.20	\$0.99	\$0.77	\$0.55
CB18	Black Cherry - size 18-24"	\$2.80	\$1.26		

(*Prunus serotina*) Black Cherry is one of our more beautiful woods. Used in furniture, flooring and trim. Grows on a variety of sites. Fast growing

CA12	American Chestnut - size 12-18"	\$5.80	\$2.61		
CA18	American Chestnut - size 18-24"	\$7.60	\$3.42		
CA2F	American Chestnut - size 2-3'	\$10.40	\$4.68		
CA3F	American Chestnut - size 3-4'	\$0.00	\$6.12		
CA4F	American Chestnut - size 4-5'	\$24.00	\$10.80		

(*Castanea dentata*) Native to the eastern United States. Its natural range does not extend into Iowa, Wisconsin or Minnesota and barely into eastern Illinois. The plague of this species has been the disease "chestnut blight" which wiped out millions of trees last century. The killed trees readily resprout and grow for some years before they, too, succumb to the disease. Scattered groves in the upper Midwest have escaped the disease. Others have been hit. Plant two trees or more for the nuts to fill.

HK18	Hackberry - size 18-24"	\$2.20	\$0.99		
HK2F	Hackberry - size 2-3'	\$3.20	\$1.44		
HK3F	Hackberry - size 3-4'	\$5.60	\$2.52		
HK4F	Hackberry - size 4-5'	\$11.20	\$5.04		
HK5F	Hackberry 5'+	\$13.60	\$6.12		

(*Celtis occidentalis*) The wood of Hackberry is similar to elm and it was thought that this species would replace elm in the lumber trade after the destruction of elm by the Dutch Elm disease. A few can be mixed into plantings. Thought of as a bottomland species, but many are growing on uplands. Makes a good shade tree. Sturdy.

HB3"	Bitternut Hickory - size 3-6"	\$1.92	\$0.86	\$0.67	\$0.48
HB6"	Bitternut Hickory - size 6-12"	\$2.76	\$1.24	\$0.97	\$0.69
HB12	Bitternut Hickory - size 12-18"	\$3.10	\$1.44	\$1.12	
HB2F	Bitternut Hickory - size 2-3'	\$4.80			

(*Carya cordiformis*) Once thought as a weed tree, the wood of Bitternut Hickory is being used more commercially. It is a dependable mast (nut) producer and wildlife can count on it. The name states the human opinion of the nutmeats.

HS3"	Shagbark Hickory - size 3-6"	\$1.92	\$0.86	\$0.67	\$0.48
HS6"	Shagbark Hickory - size 6-12"	\$2.76	\$1.24	\$0.97	\$0.69
HS12	Shagbark Hickory - size 12-18"	\$3.28			

(*Carya ovata*) Shagbark Hickory is the hickory most of us remember when we think "hickory nuts". An upland species, it grows slowly in the juvenile stages. Should be planted with other slow starting species.

HSH3"	Shellbark Hickory - size 3-6"	\$1.92	\$0.86	\$0.67	\$0.48
HSH6"	Shellbark Hickory - size 6-12"	\$2.76	\$1.24	\$0.97	\$0.69
HSH12	Shellbark Hickory - size 12-18"	\$3.28	\$1.48		
HSH18	Shellbark Hickory - size 18-24"	\$4.80	\$2.16		
HSH2F	Shellbark Hickory - size 2-3'	\$8.80	\$3.96		
HSH3F	Shellbark Hickory - size 3-4'	\$12.00	\$5.40		
HSH4F	Shellbark Hickory - size 4-5'	\$16.80	\$7.56		

(*Carya laciniosa*) The appearance of Shellbark Hickory closely resembles Shagbark. The leaves and the bark are similar. The nut of the Shellbark is much larger. But the nutmeats of some individual trees of Shellbark do not have the consistent good flavor found in Shagbark. Shellbark is often found on floodplains and prefers good, deep soils. Grows faster than Shagbark.

CK6"	Kentucky Coffeetree - size 6-12"	\$1.52	\$0.68	\$0.53	\$0.38
CK12	Kentucky Coffeetree - size 12-18"	\$1.92	\$0.86	\$0.67	\$0.48
CK18	Kentucky Coffeetree - size 18-24"	\$2.20	\$0.99	\$0.77	\$0.55
CK2F	Kentucky Coffeetree - size 2-3'	\$2.72	\$1.22	\$0.95	\$0.68
CK3F	Kentucky Coffeetree - size 3-4'	\$7.20	\$3.24		
CK4F	Kentucky Coffeetree - size 4-5'	\$8.80	\$3.96		
CK5PL	Kentucky Coffeetree - size 5 +	\$15.20	\$6.84		

(*Gymnocladus dioica*) The Kentucky Coffee tree is a legume. The bean is said to have been used by early settlers as a substitute for coffee. It is native to Iowa, southeast Minnesota and southern Wisconsin - and all of Illinois. It's a handsome tree used as an ornamental and can be mixed in with reforestation plantations.

MR18	Red Maple - size 18-24"	\$2.32	\$1.04		
MR2F	Red Maple 2-3'	\$2.72	\$1.22		
MR3F	Red Maple - size 3-4'	\$5.60	\$2.52		
MR4F	Red Maple - size 4-5'	\$7.20	\$3.24		
MR5PL	Red Maple - size 5'+	\$9.20	\$4.14		

(*Acer rubra*) Red Maple should not be confused with cultivars of Norway maple whose reddish leaf color persist through the summer season. Red Maple is native to eastern United States, but its range does not cross the upper Mississippi River. Generally it has a brilliant fall color.

OWH3"	White Oak - size 3-6"	\$1.56	\$0.70	\$0.55	\$0.39	<i>(Quercus alba)</i> Historically, white oak may be the most important of all oaks - perhaps all U.S. hardwoods. It ranges from Texas to northern Florida, north to mid-northeast Minnesota and east to the whole Atlantic seaboard up to Nova Scotia. Use for ship construction, homes, furniture, fence posts, flooring, railroad ties, etc. It is an upland species, but will be found on well drained bottom sites. Many fine homes have been built amid white oak trees. But alas - few were planted for landscaping for several generations as the public went for exotics, cultivars, and "fast growing" trees. White oak generally is not a fast starter as a seedling in our area. So plant with hickories, bur oak, etc. Growth rates pick up after 5 years or so and I've seen stumps two feet across that had fewer than 50 growth rings!
OWH6"	White Oak - size 6-12"	\$1.68	\$0.76	\$0.59	\$0.42	
OWH12	White Oak - size 12-18"	\$1.84	\$0.83	\$0.64	\$0.46	
OWH18	White Oak - size 18-24"	\$2.32	\$1.04	\$0.81	\$0.58	
OWH2F	White Oak - size 2-3'	\$4.80	\$2.16	\$1.68	\$1.20	
OWH3F	White Oak - size 3-4'	\$5.80	\$2.61	\$2.03		
OWH4F	White Oak - size 4-5'	\$8.80	\$3.96			
OWH5F	White Oak - size 5' +	\$15.20	\$6.84			
OWH6F	White Oak - size 6-7'	\$18.80	\$8.46			

PC6"	Northern Pecan - size 6-12"	\$1.68	\$0.76	\$0.59	\$0.42	<i>(Carya illinoensis)</i> Pecans are a species of hickory, and the lumber from pecan is often marketed as hickory - and vice versa. These pecans are from a northern seed source and have proved hardy in the upper Midwest. Trees in our area planted years back are bearing nuts. The nut is smaller than the pecans that come from commercial varieties from the South, but are every bit as tasty. Individual trees vary in their dependability for annual crops. But this is also true of other hickory species and most nut species. Fairly fast growing. Prefers good well drained soil and occurs naturally mostly on bottomlands.
PC12	Northern Pecan - size 12-18"	\$1.84	\$0.83	\$0.64	\$0.46	
PC18	Northern Pecan - size 18-24"	\$2.32	\$1.04	\$0.81	\$0.58	
PC2F	Northern Pecan - size 2-3'	\$4.00	\$2.16	\$1.68		
PC3F	Northern Pecan - size 3-4'	\$5.80	\$2.61			
PC4F	Northern Pecan - size 4-5'	\$8.80	\$3.96			
PC5PL	Northern Pecan - size 5'+	\$14.00	\$6.30			

WAB6"	Walnut - size 6-12"	\$1.68	\$0.76	\$0.59	\$0.42	<i>(Juglans nigra)</i> American Black Walnut, especially from the upper Midwest, is perhaps the most prestigious wood in the world. Over the years the value of our walnut logs is such that the lowest grade walnut logs exceeds the highest grade logs of almost any other of our native species - with a few exceptions. And the best walnut veneer logs can exceed the lowest grade walnut lumber logs by a factor of 20 - or on a boardfoot basis, a top veneer is worth 20 times a lumber grade walnut log. Generally speaking, the best logs come out of mixed species forest. Recommend that a tree planting should not have more than 25% walnut seedlings in the mix.
WAB12	Walnut - size 12-18"	\$1.92	\$0.86	\$0.67	\$0.48	
WAB18	Walnut - size 18-24"	\$2.32	\$1.04	\$0.81	\$0.58	
WAB2F	Walnut - size 2-3'	\$2.72	\$1.22			
WAB3F	Walnut - size 3-4'	\$5.80	\$2.61			
WAB4F	Walnut - size 4-5'	\$7.60	\$3.42			
WAB5F	Walnut - size 5'+	\$15.20	\$6.84			

Hybrid Poplar & Cottonwoods - Populus & Salix Species

Our total hybrid poplars, cottonwood, cottonwood hybrids, and willows inventories are due to update soon.

PIC10"	Imperial Carolina Hybrid - 10" cuttings	\$4.00	\$1.80	\$1.40	\$1.00	This hybrid poplar is best suited for the most northern states. This advice is based on the research done by universities and the U.S. Forest Service over the years. Hybrid poplars and cottonwoods which are all the same genus, <i>Populus</i> , continue to be researched and tested in different geographic areas. They show promise for bio-mass production and wood products.
PIC4F	Rooted Imperial Carolina Hybrid - size 4-6 ft	\$8.80	\$3.96	\$3.08	\$4.00	
PIC7F	Rooted Imperial Carolina Hybrid - size 7-10 ft	\$23.20	\$10.44	\$8.12	\$5.80	
PIC11	Rooted Imperial Carolina Hybrid - size 11 ft plus	\$32.00	\$14.40	\$11.20	\$8.00	
NC10"	Native Cottonwood - 10" cuttings	\$4.00	\$1.80	\$1.40	\$1.00	<i>(Populus deltoides)</i> Lumber suited for farm building interiors. The fast growth of cottonwoods can provide quick shade for livestock, home, etc.
NC4F	Rooted Native Cottonwood - 4 - 6 feet	\$8.80	\$3.96	\$3.08	\$2.20	
NC6P	Rooted Native Cottonwood - 6 feet plus	\$16.00	\$7.20	\$5.60	\$4.00	
SC10"	Siouxland Cottonwood - 10" cuttings	\$4.00	\$1.80	\$1.40	\$1.00	The cuttings can be stuck into moist soil to establish a tree. Siouxland Cottonwood is a male clone widely sold. No cotton. Has limitations.
SC7F	Souixland Rooted Cottonwood - size 7-10 ft	\$16.00	\$7.20	\$5.60	\$4.00	
SC11P	Souixland Rooted Cottonwood - size 11 ft pl	\$22.80	\$10.26	\$7.98	\$5.70	
SCS3F	Sheared at 2' Sp'09, rooted Souixland size 3-5 ft.	\$11.20	\$5.04	\$3.92	\$2.80	

WC18"	Black Willow Cuttings - size -18"	\$4.00	\$1.80	\$1.40	\$1.00	<i>(Salix nigra)</i> These cuttings can be stuck into the ground to establish field windbreaks or bio-mass plantings or to stabilize stream banks.
-------	-----------------------------------	--------	--------	--------	--------	--

Shrubs & Small Trees

PLA6"	American Plum - size 6-12"	\$1.16	\$0.52	\$0.41	\$0.29	<i>(Prunus americana)</i> This small tree/shrub is well named - being found from the Rocky Mountains to the Atlantic Ocean, from Canada to the Gulf. It usually occurs in thickets - spreads readily by suckers - and provides cover for birds and wildlife. In the spring the profuse blossoms can fill the countryside with a wonderful fragrance. Fruit can be used for jams, wine, etc. For borders, American Plum and most hardwood shrubs should be planted about 3-5 feet apart.
PLA12	American Plum - size 12-18"	\$1.56	\$0.70	\$0.55	\$0.39	
PLA18	American Plum - size 18-24"	\$1.92	\$0.86	\$0.67	\$0.48	
PLA2F	American Plum - size 2-3'	\$2.20	\$0.99	\$0.77	\$0.55	
PLA3F	American Plum - size 3-4'	\$3.16	\$1.42			
PLA4F	American Plum - size 4-5'	\$4.80	\$2.16			

BB6I	Buttonbush - size 6-12"	\$2.20	\$0.99	\$0.77	\$0.55	<i>(Cephalanthus occidentalis)</i> Buttonbush is a native shrub, generally found in riparian (stream side) areas. Reaches a height of approximately 8 feet. Fruit is red. <i>(Prunus virginiana)</i> Chokecherry is a small tree. The red berry fruit is excellent for birds and wildlife. Adaptable to many sites.
BB12	Buttonbush - size 12-18"	\$2.40	\$1.08	\$0.84	\$0.60	
BB18	Buttonbush - size 18-24"	\$3.12	\$1.40	\$1.09	\$0.78	
BB2F	Buttonbush - size 2-3'	\$4.80	\$2.16	\$1.68	\$1.20	
CHC12	Choke Cherry - size 12-18"	\$3.12	\$1.40			

DG6"	Gray Dogwood - size 6-12"	\$1.16	\$0.52	\$0.41	\$0.29	<i>(Cornus racemosa)</i> Gray Dogwood is perhaps the most widespread of our indigenous dogwoods in the upper Midwest. It is found mostly on upland sites and has profuse gray berries in the fall. The thickets of this shrubs along roadsides and across the landscape are definitely a major part of the character of our rural areas. Important to wildlife.
DG12	Gray Dogwood - size 12-18"	\$1.56	\$0.70	\$0.55	\$0.39	
DG18	Gray Dogwood - size 18-24"	\$1.92	\$0.86	\$0.67	\$0.48	
DG2F	Gray Dogwood - size 2-3'	\$2.20	\$0.99	\$0.77	\$0.55	
DG3F	Gray Dogwood - size 3-4'	\$3.00				

DR3"	Red Osier Dogwood - size 6-12"	\$1.16	\$0.52	\$0.41	\$0.29	<i>(Cornus stolonifera)</i> Red Osier Dogwood's glory is in the winter when the red stems stand out strikingly from the snow covered ground. A row in a windbreak contrasts attractively with evergreens also. Grows to 10 feet or more.
DR6"	Red Osier Dogwood - size 12-18"	\$1.56	\$0.70	\$0.55	\$0.39	
DR18	Red Osier Dogwood - size 18-24"	\$1.92	\$0.86	\$0.67	\$0.48	
DR12	Red Osier Dogwood - size 2-3'	\$2.20	\$0.99	\$0.77	\$0.55	
DR3F	Red Osier Dogwood - size 3-4'	\$3.00	\$1.35			

DS6"	Silky Dogwood - size 6-12"	\$1.16	\$0.52	\$0.41	\$0.29	<i>(Cornus amomum)</i> Silky dogwood is similar in appearance to red osier dogwood. May be more at home in moist to wet soils. Has attractive red stem also. Though many stemmed dogwoods in general <u>do not</u> form dense single row barriers.
DS12	Silky Dogwood - size 12-18"	\$1.56	\$0.70	\$0.55	\$0.39	
DS18	Silky Dogwood - size 18-24"	\$1.92	\$0.86	\$0.67	\$0.48	
DS2F	Silky Dogwood - size 2-3'	\$2.20	\$0.99	\$0.77	\$0.55	
DS3F	Silky Dogwood - size 3-4'	\$3.00	\$1.35	\$1.05		
DS4F	Silky Dogwood - size 4-5'	\$4.40				
HZ6"	Hazelnut - size 6-12"	\$2.00	\$0.90	\$0.70	\$0.50	<i>(Corylus americana)</i> Hazelnut or American Filbert was once more common, as it liked to invade abandoned fields and pastures. The nut is small, but as tasty as Turkish varieties found in grocery stores. Some breeding is being done to improve yields. Grows about anywhere on uplands.
HZ12	Hazelnut - size 12-18"	\$2.60	\$1.17	\$0.91	\$0.65	
HZ18	Hazelnut - size 18-24"	\$3.60	\$1.62			
HZ2F	Hazelnut - size 2-3'	\$5.20				
LIL6"	Lilac - size 6-12"	\$2.40	\$1.08	\$0.84	\$0.60	<i>(Syringa vulgaris)</i> Common lilac. Not native to America but seems like it should be. Hardy and makes home "sweet" home.
LIL12	Lilac - size 12-18"	\$3.20	\$1.44	\$1.12	\$0.80	
PER12	Persimmon - size 12-18"	\$7.00	\$3.15	\$2.45	\$1.75	<i>(Diospyros virginiana)</i> The Persimmon is found in Dubuque County along railroad tracks where it is supposed railroad workers or veterans of the Civil War threw out the fruit pits as they traveled home. Fruit should turn mushy to be eaten - or after a frost
PER18	Persimmon - size 18-24"	\$10.40	\$4.68	\$3.64	\$2.60	
PER2F	Persimmon - size 2-3'	\$0.00	\$0.00	\$0.00	\$0.00	
SER6"	Serviceberry - size 6-12"	\$1.92	\$0.86	\$0.67	\$0.48	<i>(Amelanchier arborea)</i> Serviceberry is a shrub or small tree with white blossoms as spring arrives. Found over the whole eastern United States. Edible purple to red fruit. Plant for wildlife and aesthetics.
SER12	Serviceberry - size 12-18"	\$2.20	\$0.99	\$0.77	\$0.55	
SER18	Serviceberry - size 18-24"	\$3.16	\$1.42	\$1.11	\$0.79	
SER2F	Serviceberry - size 2-3'	\$4.80	\$2.16	\$1.68	\$1.20	

Landscape

		1-24	25+		
HKLS	Hackberry size 6' - landscape	\$20.00	\$14.00		These bareroot trees are the biggest and the best of our stock. They are selected for a full and balanced root system and top. They should be staked after planting to keep them stable in high winds. Planting these native trees around a home, park, along hiking and bicycle paths is the right thing to do. Maintenance should include periodic watering as warm and dry weather develops. A berm or "pond bank" around the tree to retain water when applied helps the water to filter deep into the root area - and not just run away down hill. A few fertilizer tablets or fertilizer stakes are recommended.
OPILS	Pin Oak (<i>Q. palustris</i>) - 7'+ Landscape grade	\$25.00	\$20.00

Potted Trees & Evergreens

		1-24	25+		
XSBH3	Black Hills Spruce - Potted - size 3-4'	\$32.50	\$26.00		<i>(Picea glauca)</i> Black Hill Spruce makes a fine landscape evergreen. It tends to have a dark green color and dense crown. It is one of the slower growing spruces, however. For windbreaks, space 12 to 20 feet apart.
XSBH4	Black Hills Spruce - potted - size 4-5'	\$47.50	\$38.00		
XSBH5	Black Hills Spruce - Potted - size 5-6'	\$65.00	\$52.00		
XSBU3	Blue Spruce - potted - size 3-4'	\$45.00	\$36.00		<i>(Picea pungens)</i> This well known spruce from the Rocky Mountains can vary from blue to green in color. We do not offer cultivars selected for their very blue color - only natural seedlings. Thus our trees have the natural variation.
XSBU4	Blue Spruce - Potted - size 4-5'	\$56.25	\$45.00		
XSBU5	Blue Spruce - Potted - size 5-6'	\$67.50	\$54.00		
XAG4F	Dark Green Arborvitae - potted - size 4-5'	\$35.00	\$28.00		Dark Green Arborvitae is a cultivar of American Arborvitae. It has a more pyramidal shape than Techny but looks very similar. On very sandy or dry soils, or more southern geographic areas, techny may be preferred. In windbreaks or screens, space 4 to 8 feet apart.
XAG5F	Dark Green Arborvitae - potted - size 5-6'	\$47.50	\$38.00		
XAG6F	Dark Green Arborvitae - potted - size 6-7'	\$65.00	\$52.00		
XSN3F	Norway Spruce - Potted - 3-4'	\$32.50	\$26.00		<i>(Picea Abies)</i> Norway Spruce has been a standard around farmsteads since pioneer days. It has served well. It can grow to 100 feet. It is adaptable to many sites. It is the fastest growing of any common spruce. In windbreaks, plant these spruce 14 to 20 feet apart.
XSN4F	Norway Spruce - Potted - size 4-5'	\$47.50	\$38.00		
XSN5F	Norway Spruce - potted - size 5-6'	\$65.00	\$52.00		
XSN6F	Norway Spruce - Potted - size 6-7'	\$81.25	\$65.00		
XAT18	Techny Arborvitae - potted - size 18-24"	\$17.50	\$14.00		Techny Arborvitae, another American Arborviate cultivar is very popular for good reasons. It's tough. A row of Techny in every windbreak is a suggestion that rarely goes wrong. For a single row windbreak, this would be the best suggestion in most cases. All Arborvitaes maintain a tight windbreak or screen right to ground level. Plant from 4 feet to 8 feet apart in windbreaks or for screen. Can be sheared into a shaped hedge.
XAT2F	Techny Arborvitae - potted - size 2-3'	\$27.50	\$22.00		
XAT3F	Techny Arborvitae - potted - size 3-4'	\$32.50	\$26.00		
XAT4F	Techny Arborvitae - potted - size 4-5'	\$47.50	\$38.00		
XAT5F	Techny Arborvitae - potted - size 5-6'	\$65.00	\$52.00		
XPW2F	White Pine - potted - Size 2-3' (leggy)	\$17.50	\$14.00		<i>(Pinus strobus)</i> Eastern White Pine, has attractive, soft needles and lofty form. It grows 3 feet or more per year once re-established. For quick height in landscaping, screens, and windbreaks, White Pine excels. Plant 14 to 20 feet apart. As White Pine ages, it get more open at ground level and thus 2nd row with arborvitae is recommended. Spruce can also be used in the second or third rows as can hardwood shrubs.
XPW3F	White Pine - potted - Size 3-4' (leggy)	\$20.00	\$16.00		
XPW4F	White Pine - Potted - Size 4-5'	\$47.50	\$38.00		
XPW5F	White Pine - Potted - size 5-6'	\$57.50	\$46.00		
XPW6F	White Pine - Potted - size 6-7'	\$65.00	\$52.00		
XPW7F	W. Pine - Potted - size 7-10 ft Pot wieght 150lb+	\$90.00	\$72.00		
XSW3F	White Spruce Potted - size 3-4'	\$32.50	\$26.00		
XSW4F	White Spruce Potted - size 4-5'	\$47.50	\$38.00		
XSW5F	White Spruce Potted - size 5-6'	\$65.00	\$52.00
